Testimonials

"I have successfully worked with Metalcraft on two recently completed projects in Sussex Gardens, London W2 where there was a combination of hard and soft landscaping works together with the introduction of metal railings around the private garden areas. The overall cost of the works exceeded £800,000 (excl VAT). I have generally been impressed by the quality of Metalcraft's work and have found them to be both professional and personable in their approach and proactive in dealing with any challenges that arise. I hope to work with them on other projects in the future".

Stuart J Hutchison, Associate

Knight Frank

"I have known and had the pleasure of doing business with Metalcraft for 25 years or more and have always found them very understanding of our needs as Consultants representing our clients. They always deliver very speedy and comprehensive quotations. The quality of materials and workmanship is always high. I would recommend them highly to any company wanting good quality metalworks".

Nigel Rickard, Director

BRITTAIN HADLEY

"We have worked with Metalcraft on two projects at Sussex Gardens, London W2 for The Chuch Commissioners. Great people to work with, proactive, they take pride and care in everything they do, and we worked together to construct two new stunning gardens".

Davies Utility Services

Testimonials

Metalcraft have recently installed new period-style railings around the private garden in Hyde Park Square, W2, London. The site was challenging, given different ground levels around the Square, the protuberance of tree roots interfering with new foundations, the need to remove old foundations, the requirement not to damage the garden in any way, and the constant flow of traffic within metres of where the team was working.

The results have been superb. The quality of work has been excellent; all specifications have been met fully, and the finish is of an exceptionally high standard, both in the stone footings and the ironwork, the Square having been transformed to its former glory. It has also been a pleasure dealing with David Sugarman and his team – they have been helpful and courteous at all times, and have listened to feedback and acted on it in a professional manner and with a positive spirit. We would have no hesitation in recommending Metalcraft.
